

**It costs over \$30/year to power the average light bulb - that's enough for 3 Blaze pizzas per light bulb!**

Don't forget to turn off the lights!

**DID YOU KNOW?**

# **When plugged in, chargers and other electronics consume energy even when they aren't in use.**

Save money and energy by always unplugging chargers, TVs, and microwaves when not in use!

---

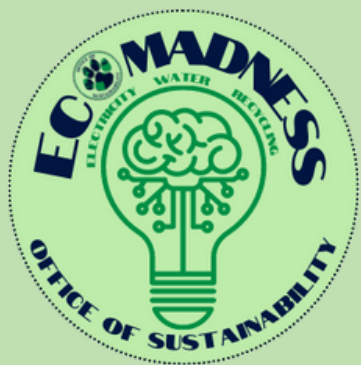

**DID YOU KNOW?**

**It takes over 350 pounds of coal to power a 50-watt light bulb for one year, or 70 pounds of natural gas.**

Don't forget to turn off the lights!
